PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with strong knowledge of Python, OOP, DSA, SQL, REST APIs, and software development. Hands-on experience in AI/ML, data processing, automation, and CI/CD. Strong problem-solving and debugging skills with experience developing and testing software applications.

TECHNICAL SKILLS

Programming: Python, Java (Basic), JavaScript, SQL, React (Basic)
Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Software Development
Backend & APIs: REST APIs, Node.js (Basic), Express.js (Basic)
AI & Machine Learning: Machine Learning, PyTorch, TensorFlow, Scikit-learn, NLP, NumPy, Pandas
Databases: MySQL, MongoDB, SQL

PROJECTS

Secure Real-Time Chat Application | React.js, Node.js, Python | Link

- Developed a real-time chat application using React.js for the frontend and Node.js for backend services.
- Implemented secure message transmission using a simulated Quantum Key Distribution (QKD) workflow and encryption mechanisms.
- Applied Object-Oriented Programming, modular software design, input validation, and secure coding practices across application components.
- Designed client-server communication workflows with emphasis on reliability, data privacy, and maintainable code.

Weather Rain Prediction System | Python, Scikit-learn, CI/CD | Link

- Developed a machine learning pipeline to predict rainfall from historical weather data using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, model training, and evaluation to build the prediction workflow.
- Automated testing and CI/CD workflows using GitHub Actions, CircleCI, and GitLab CI for repeatable software delivery.
- Structured the project using version-controlled source code and reproducible development practices.

Hybrid Anime Recommendation System | Python, PyTorch, Docker, Kubernetes | Link

- Developed a hybrid recommendation system combining collaborative filtering and content-based filtering to generate personalized anime recommendations.
- Implemented an end-to-end machine learning pipeline using PyTorch with experiment tracking through Comet ML and dataset/model versioning using DVC.
- Containerized the application using Docker and automated deployment with Jenkins and Kubernetes.
- Designed a reproducible training and deployment workflow to improve scalability, maintainability, and consistency across environments.

EDUCATION

Bachelor of Engineering in Computer Engineering
SND College of Engineering and Research Center | 2022–2026
CGPA: 7.9/10

Higher Secondary Certificate (HSC)
Swami Muktanand Junior College | 2022
Percentage: 74.67%

Secondary School Certificate (SSC)
Swami Muktanand Vidyalaya | 2020
Percentage: 85.60%

CERTIFICATIONS

- Alpha: Data Structures and Algorithms with Java – Apna College
- Delta: Full Stack Web Development – Apna College
- Complete Data Science, ML, DL & NLP Bootcamp – Udemy

ACHIEVEMENTS

- Solved 220+ Data Structures and Algorithms problems on LeetCode (profile: swapnil_04).
